## EDUCATION

Austin, TX 2020	University of Texas at Austin	August 2016-May
--------------------	-------------------------------	-----------------

- **Major:** Electrical and Computer Engineering, B.S.E (GPA: X.X)
- **Technical Cores:** Software Engineering and Design, Data Science and Information Processing
- **Programming Coursework:** Algorithms and Data Structures, Software Lab, Software Testing, Software Architectures, Software Design and Implementation I & II, Python Programming, Network Security

## EXPERIENCE

Software Engineer, Intern 2019	PROS Inc.	June 2019 -August
-----------------------------------	-----------	-------------------

PROS Group Sales Optimizer Team and Rental Team ([www.pros.com](http://www.pros.com)): Back End Development

- Improved Rental testing performance by 12% by implementing an automated transfer generator in Java.
- Integrated internal exchange rate web service API with GSO application which increased data precision of GSO exchange rates by *five decimal places* and subsequently reduced customer pricing inaccuracies.
- Replaced 90% of legacy code in build gradle script to integrate with open-source Docker Plugins.
- Spearheaded 3 different projects through full development lifecycle in a fast-paced agile environment.
- Leveraged knowledge in *Java, Spring, Gradle, Groovy, Databases, SQL, HTTP, REST, XML, Docker, and Agile*.

Software Engineer, Intern 2018	PROS Inc.	June 2018 – August
-----------------------------------	-----------	--------------------

PROS Rental Team and Scientific Analytics Team ([www.pros.com](http://www.pros.com)): Full Stack Web Development

- Implemented Filter Bar UI component into PROS UI library by utilizing React, JavaScript, HTML/CSS.
- Improved SA data visualization tools by 15% by integrating a Heat Map and achieved 100% code coverage
- Won *1st Place* at PROS intern Hackathon by building a B2B pricing product that leveraged prices to provide a dynamic pricing estimator and sentiment analyzer to deliver consumer feedback from YouTube comments.
- Selected as 1 out of 32 interns to demo Filter Bar at monthly UI meeting to all UI developers at PROS.
- Leveraged knowledge in *Full Stack Web Development, Javascript, React, Chrome Developer tools, and Agile*.

## SOFTWARE PROJECTS

**Personal Website:** [www.armankhondker.com](http://www.armankhondker.com) (for additional information and projects)

### Twitter Tweet Polarity Analysis Bot

- Built a Twitter Bot to parse Tweets and determine sentiment scores with natural language processing.
- Integrated sentiment scores from over 5000+ tweets on laptop brands into price forecasting model.
- Utilized: *Python, Flask, Javascript, HTML/CSS, Git, Twitter Developer Kit, Tweepy API*

### LineDriveBetting Aggregated Sports Betting Data Web App

- Implemented a full-stack web app that aggregates popular sports betting lines and predictions
- Utilized: *Python, React, AWS, Web Scrapping, HTML/CSS, Git*

### YouTube Video Comment Sentiment Analyzer

- Developed a web app that parses YouTube comments from videos to determine sentiment polarity.
- Won first place at PROS Intern Hackathon and received prize for most innovative open-source solution.
- Utilized: *Python, React, Javascript, Git, HTML/CSS, YouTube Data V3 API, Natural Language Processing*

### RGK Connect Matching Algorithm Web App

- Developed a full-stack web app that provides matching for participants of RGK Connect Program
- Utilized: *Java, React, AWS, HTML/CSS, Git*

### Amazon Price Tracker with Email Notifications

- Created a price tracker app to send an email notification when Amazon items drop in price.
- Utilized: *Python, Flask, Web Scrapping, HTML/CSS, Git*

## SKILLS

---

**Software:** *Java, Python, JavaScript, React, HTML/CSS, C/C++, Git, Unix, Agile, Swift, Go, Spring, HTTP, REST, SQL*
